

## Notice to State Employees, Legislators & Visitors to the State House Complex

DATE: July 10, 2006

RE: Notice of State House Complex parking lot work and road closure

Please be advised that Parking Lot A in the State House complex (adjacent to the State House) will be closed for several months in order to install traffic and pedestrian safety improvements. While the road and parking lot work is on-going, no thru-traffic from State Street to Sewall Street will be allowed. Beginning on or about July 17, 2006, the parking lot and the State Street entrance to the complex will be closed to all traffic. Parking Lot B, the lower parking lot along State Street, east of the cultural building, will remain open, and ingress and egress will be from the southern entrance along State Street. During construction, disability parking spaces will be temporarily relocated to immediately south of the Cross Building and to the west of the cultural building near handicap-accessible entrances. Directional signs will be placed to guide vehicular and pedestrian traffic during the construction. The attached photo shows the project area.

The site improvements include relocation and straightening of traffic lanes within the State House complex, construction of sidewalks, installation of curbing, lighting, and emergency call boxes, and construction of pedestrian crosswalks and an entrance plaza to the State House.

The roadway and parking lot are scheduled to re-open by November 1st. For information concerning the project contact the Office of the Executive Director, Legislative Council, at 287-1615. Questions about parking or traffic during construction may be directed to the Bureau of Capitol Security at 287-4357.
